Investment Treaty Disputes

Todd is widely recognized as a pioneer in the development of international investment law and dispute settlement.

With a background in international trade policy and public international law, Todd played a significant role as counsel in many early NAFTA cases.

For over two decades, Todd appeared as counsel and/or advised governments, investors, third-party funders, NGOs, and indigenous nations in many dozens of disputes, in addition to serving as arbitrator.

Todd has long been an ardent proponent of investor-state arbitration, property rights, and their contribution to the rule of law globally. He is a much sought-after speaker, media commentator, and academic reviewer, as well as a prolific author and editor.

Todd also continues to provide expert advice on the law of international investment, both as an expert witness and as a consultant to counsel involved in investment disputes.

Environment & Climate Change

Todd has acted as counsel in cases involving hazardous waste remediation services, the siting and construction of landfill and waste-transfer facilities, and the application of environmental regulations to real estate developments.

Todd is also currently serving as a consultant in the Government of Alberta's NAFTA Legacy Claim against the Government of the United States arising from the latter's cancellation of the Keystone XL Pipeline, ostensibly in the interests of climate change remediation.

Todd has served as counsel and consultant in several disputes involving natural resources extraction rights, including minerals, and oil & gas. He has also recently served as an expert consultant in an investor-state treaty arbitration involving deep-water dredging for the recovery of a valuable mineral resource.

Todd also served as a non-resident teaching fellow at the University of Dundee's Centre for Energy Petroleum Law & Policy between 2001 and 2005 and as Stephen Dattels Fellow in Mining & Finance Law at the University of Western Ontario in 2007.

Land Development, Hospitality & Gaming

Todd has served as counsel and consultant in a variety of disputes involving the development of residential resort communities and of hospitality and gaming facilities across the globe, from Costa Rica to Egypt to Laos. In addition, Todd sat as arbitrator in a notorious case involving construction of the home of Russia's Supreme Court.

One of Todd's earliest cases, serving as counsel, involving gaming regulation in Mexico, which generated new law on detrimental reliance claims based on the principle of legitimate expectations.
